Small Business Pulse Survey: Regions Footprint

The U.S. Census Bureau's *Small Business Pulse Survey* is designed to measure changes in conditions amongst small businesses during the COVID-19 pandemic. First introduced in April, the survey ran through June, went on hiatus during July, then picked back up ("Phase Two") in August. The second phase continues most of the questions asked in the initial phase and introduces a few new questions that naturally follow from the course of the pandemic and the policy response. As in the initial phase, survey results are available on the national and state levels, as well as for the nation's 50 largest (based on population) metro areas, a group which includes 19 metro areas within the Regions footprint. As we did during the initial phase of the Small Business Pulse Survey, we will produce summaries which include the U.S. averages and individual snapshots of each of the 15 in-footprint states and the 19 in-footprint metro areas for which data are available. The latest survey period covered September 27 through October 3.

The main message in the *Small Business Pulse Survey* data has not changed appreciably over Phase Two – things may not be getting worse, but neither do they appear to be getting much better. Instead, large majorities of firms continue to report no change in key metrics such as weekly revenues, the number of paid employees, and the aggregate number of paid hours worked. Still, while staying the same is better than getting worse, getting better is clearly preferable, and there just isn't as much of that going on amongst small businesses at this stage of the game than we may have anticipated would be the case at the onset of the pandemic. This does, however, fit into our premise that the recovery from the brief but violent recession resulting from the pandemic and the efforts to stem its spread will be fairly slow and uneven.

This supports the case for further financial aid to small businesses and to households, which has been the topic of considerable discussion but which looks increasingly less likely until after the November elections. We discuss the financial situation of households in our regular summaries of the *Household Pulse Survey*, and data from *Small Business Pulse Survey* make the case for further aid to small businesses, in the form of an additional round of funding for the Paycheck Protection Program (PPP). As the bottom chart shows, sizable majorities of small businesses in each in-footprint state and nationally have benefitted from the PPP. As of the latest survey period, 44.1 percent of small businesses nationally reported they think it will be over six months before they return to the level of operations that would have been considered "normal" a year ago, and this was the case for over 40 percent of the small businesses within the Regions footprint. While this number has edged lower over recent weeks, it nonetheless leaves a significant share of small businesses expecting a slow and drawn out recovery. This ultimately impacts whether, or to what extent, small businesses may have to further trim payrolls/hours worked in the weeks ahead should no additional financial aid be forthcoming, or be provided but only after a lengthy lag, as is looking more and more likely. Taking it one step further, it could be that some number of small businesses will not survive in the absence of another round of assistance.

In the pages that follow, we present tables summarizing the responses to what we consider the most relevant questions from the *Small Business Pulse Survey* for the individual states and largest metro areas within the Regions footprint. As in Phase One, we will provide these summaries on an ongoing basis.

<u>Atlanta Metro Area:</u>	<u>4/26-5/2</u>	<u>5/24-5/30</u>	<u>6/21-6/27</u>	<u>8/9-8/15</u>	<u>8/23-8/29</u>	<u>9/6-9/12</u>	<u>9/13-9/19</u>	<u>9/20-9/26</u>	<u>9/27-10/3</u>
